

Don't Let Schools Tell You they Won't Accept an Immunization Letter if it is a 'uni-form' Letter From A Web Site

As a result of the electrifying age of information, and in concert with the people exercising their Rights, many have utilized Writs that contain exacting information, and are submitting them to agencies, associations, courts, schools, and other entities, as an expression of their position.

In the case of the immunization letter we have on our site, and any that others have as well, it has been reported that some schools are not accepting them because they are a 'form' or uniformed letter. The fact that the people are utilizing the same information is one of the goals of the people collectively. The subject of immunization is a collective concern for many parents. The immunization letter (s) presents the same state of mind and position held by the people.

The irony of the school systems not wanting to accept the letters if they are a 'form or uni-formed' letter, is absolutely clear. Schools systems use form letters all of the time. Do not allow them to stop you from using any letter that you may have received from a website, association, or that you have written on your own. Take your position and stand on it. If they insist, ask them to submit to you the Law, not the statute, that states their authority over your submission of a letter. They do not have the authority to do so and there is no lawful validity to them making such a demand on you.

Obviously, the consciousness of the people is raising with verified information, and honorably many are concerned about what happens to their children in regard to being immunized. It is important, however, that you know what you are stating in a letter. In regards to that, they may have concerns that you don't comprehend what you yourself have submitted. The immunization letter is clear and concise, whether you come from the angle of religious freedoms, or from the angle of your personal choice to determine what is best for your child. It is your constitutionally secured, and a collective Right, not to be injected with poison. It is also very clear that they cannot tell you that you cannot submit a letter because it is widely availed to the public for the public's use.

Many Mothers are aware that the best immunization for their child is to breast feed them. It is a fact that breast fed babies are much healthier and do not contract sicknesses as much, if hardly at all, as they are immuned naturally. They take the immunities of the Mother at first feeding, this is the natural way of administering protection to your child. This is also a clear reasoning for the position one takes as their choice of natural immunization for their child.

Uneducated mothers may think they are a failure at breastfeeding because

they are not aware that colostrum, a clear liquid, comes out first. This indicates the need to educate the people regarding nature's way. It is difficult to take a natural position if you are unaware of the natural processes.

They (the states and agents for the state) are expecting that you are a product of the dumb-down education system, and that your child is a ward of the state, therefore the state determines what is best for your child. The fact that they are challenging your choice is proof that they are in conspiracy and acting as wardens, for what is presumed to be wards of the State—your child. I find that very scary - don't you?

Many associations, schools, churches and other public institutions are having a very difficult time, during these days of enlightenment. The states have presented a dumb-down education system, as is proven in the 1895—8th grade public school final test. There are 7 liberal arts which contain basic universal and fundamental teachings and no society or civilization ought ever lack in those basic teachings.

Only those who remain in a mindset that someone else is the authority over them and their children, would actually accept anyone telling and demanding of them, what they can and cannot sign their name to and submit. When we hear things like this we like to encourage you to continue on the path. When the people are of the same mindset regarding fundamental principles it is a clear sign that humanity is being uplifted, that the uni-verse is one. Verse being words, to be with words is to con-verse, and when written, becomes the written word(s), the spelling of words. The 'uni-formed' letter presents that oneness in words—uni-verse— One Word!

Under The United States Republic's Constitutional system of Government and upon the individuality and intelligence of the citizen, the state does not claim to control one's conduct to others, leaving one the sole judge as to all that affects oneself. **Mugler v. Kansas 123 US 623, 659 – 60:**
