Your soul's emotives & intellect, or inspiration & intuition, (Moon & Mercury) will dictate what your love nature is and what you desire to create (Sun & Venus). This being connected to your passions, dictates your outward actions (Mars). Once you become aware of your boundaries (which are earthly/material), you begin taking in possessions or become possessed by possessions. (Earth).

Your deeds and actions, thus far, bring you rewards or gifts AND will bring your disciplines showing where you need to sharpen your tools and bring order to your life (Jupiter & Saturn). Once you are disciplined, it is necessary to make changes. Changes require imagination (Uranus & Neptune). After imagining your reality, you enter the last phase of inner transformation (Pluto, the collective unconsciousness). In the end (which is a new beginning) your growth is for the good of ALL—The Collective.

What You Are Made Of?

Your Sun Sign is the sign you were brought to life in, it depicts your character and is a generalization of you. Your ascendant is the sign that was on the horizon when you were born. It depicts your personality and physical form (*everyone sees*). Your Moon Sign represents your soul, your inner self (*not many see*). A natal chart is necessary to determine the location of planets and their affects on you.

Decanates / Decants: (Deacons?)

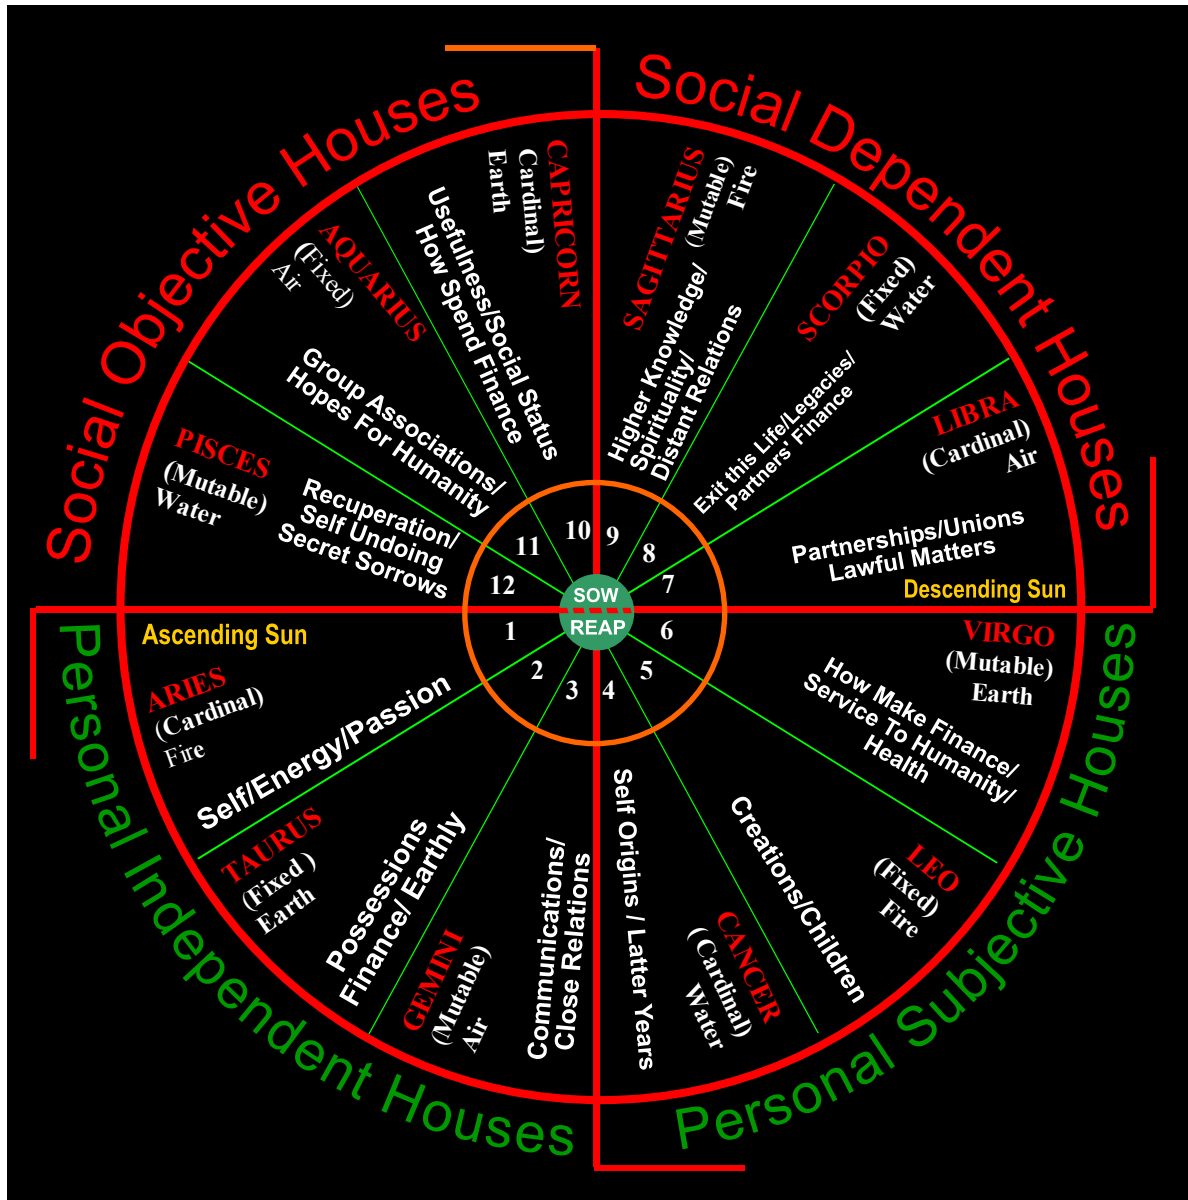

Starting with your sign, notate every other sign. These will be your natural helpers in life. (*They will always be of complimentary elements*).

Missing Something?

The three signs after your sign are the signs you are strongly attracted to as you did not receive any of their influences while in womb, unless parent(s) or siblings have influence of those signs.

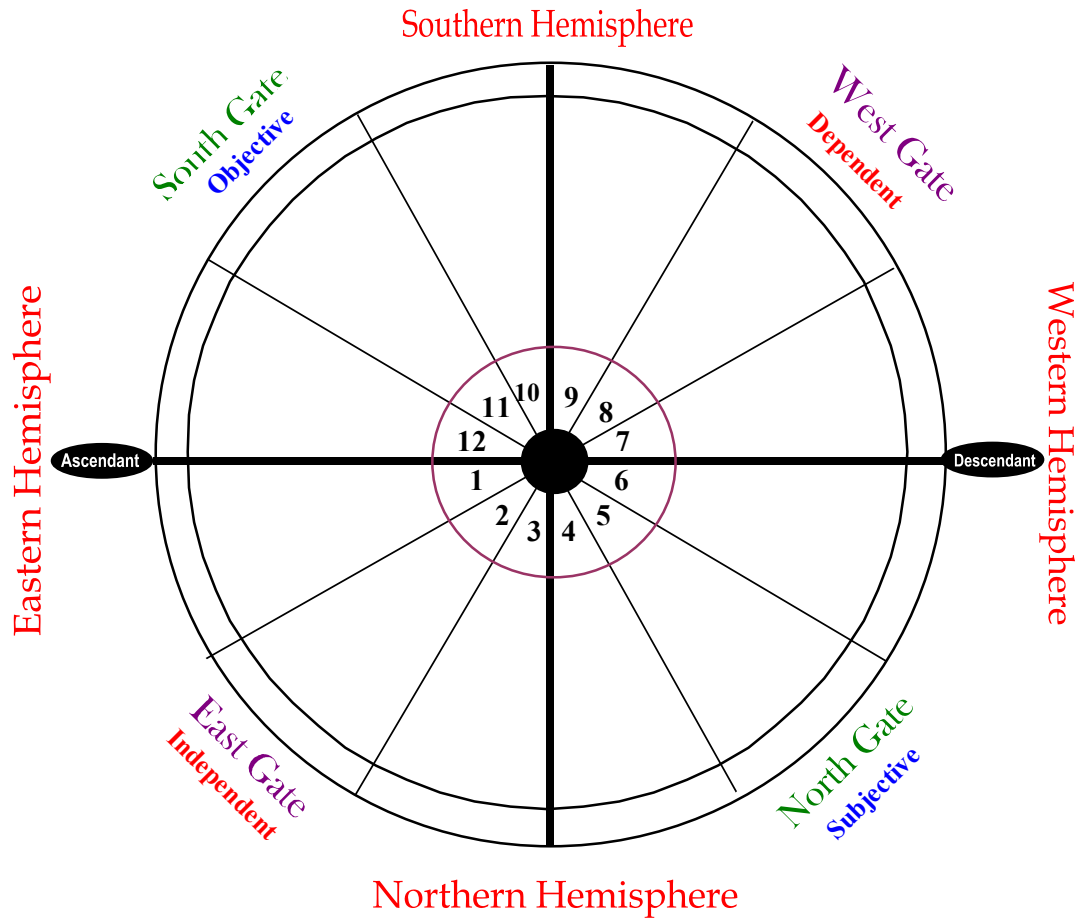

Mate:

Your 180° polar reflection (opposite) is *generally* your best mate— *a* reflection of you.
